MASTER LOG

FROM(m.): 500 TO(m.): 3250 SCALE: 1:500

Well Name	Well_Final-A1	Area:	Panna East Offshore	Block:	Mumbai Basin-PML/2010
Prospect/Structure:	Panna Anticline#1	Country:	INDIA	State/District:	Maharashtra
Rig Name	EOSIL#2000	Elevation RT/KB:	30m	Ground Level:	10m
Well Type:	Appraisal	Category:	B	Status:	Plugged and Abandoned
Well Profile:	Deviated (Build and Hold)	License Details:	Lic#BA_2010	Reference Wells:	Panna B-1, Panna B-8, Well # 7AC
Spud On:	01 Sept, 2019	Target Depth:	3200m MDDF/ 3000m TVD	Latitude	23° 33' 21.889" N
Hermetical Testing On:	30 Sept, 2019	Drilled Depth:	3250m MDDF/ 3200m TVD	Longitude	77° 55' 45.674" E
Drilling Completion On:	30 Sept, 2019	Logger's Depth:	3245m MDDF/ 3190m TVD	Client Name:	ONGC

Objective: To explore Paleocene and Early Eocene Panna prospects along with primary Bassein Limestone reservoir

▨ Clay	▨ Sandstone	▨ Silty Shale	▨ Marl	▨ Trap (Basalt)
▨ Sandy Clay	▨ Siltstone	▨ Carbonaceous Shale	▨ Granite	■ Coal
▨ Claystone	▨ Shale	▨ Limestone	▨ Metamorphics	▨ Fossiliferous Limestone
▨ Sandy Claystone	▨ Sandy Shale	▨ Dolomite	▨ Trap (TrapWash)	▨ Sand

CLAY/CLAYSTONE: Light grey to grey, soft to moderately hard, occasionally sticky, washable, feebly calcareous.Sample highly contaminated with cement

CLAY/CLAYSTONE: Light grey to grey, dark grey, occasionally brownish, soft to moderately hard, occasionally sticky, washable, feebly calcareous.

CLAY/CLAYSTONE: Light grey to dark grey, occasionally brownish grey, soft to moderately hard, occasionally sticky, washable, feebly calcareous.

CLAY/CLAYSTONE:Light grey to dark grey, soft to moderately hard, occasionally sticky, feebly calcareous.

CLAY/CLAYSTONE: Light grey to dark grey, occasionally brownish grey, soft to moderately hard, non calcareous.

CLAY/CLAYSTONE: Light grey to dark grey, occasionally brownish grey, soft to moderately hard, non calcareous.

CLAY/CLAYSTONE: Light brownish grey to dark grey, moderately hard, occasionally soft, massive, feebly calcareous.

CLAY/CLAYSTONE: Light grey to greenish grey, occasionally brick red, moderately hard, occasionally soft, massive, non calcareous.

CLAY/CLAYSTONE: Light grey to dark grey, occasionally brownish grey, moderately hard, occasionally silty, massive, feebly calcareous.

SHALE: Light grey to dark grey, soft to moderately hard, sub blocky to blocky, poorly fissile, non calcareous.

CLAY/CLAYSTONE: Light grey to dark grey, moderately hard, occasionally soft, massive, feebly calcareous.

SHALE: Light grey to dark grey, moderately hard, occasionally soft, moderately compact, poorly fissile, feebly calcareous.

SHALE: Brownish grey, greenish grey, soft to moderately hard, moderately compact, poorly fissile, feebly calcareous.

SHALE: Light grey to greenish grey, brownish grey, moderately hard, occasionally soft moderately compact, poorly fissile, feebly calcareous, forams are seen.

LIMESTONE: White, dirty white, moderately hard, compact, chalky.

SILTSTONE: Light grey, greenish grey, moderately hard, compact, feebly calcareous

SHALE: Light grey to dark grey, greenish grey, brownish grey, moderately hard, occasionally soft, moderately compact, poorly fissile, feebly calcareous.

CLAYSTONE: Light grey to dark grey, occasionally greenish grey, soft to moderately hard, feebly calcareous.

LIMESTONE: Dirty white, off white, moderately hard, compact, occasionally chalky.

SHALE:Brownish grey to dark grey, occasionally greenish grey, moderately hard and compact, occasionally soft, poorly fissile, feebly calcareous.

SHALE: Brownish grey to dark grey, occasionally greenish grey, moderately hard, occasionally soft, moderately compact, poorly fissile, feebly calcareous.

LIMESTONE: Dirty white, moderately hard, compact.

SHALE: Light grey to brownish grey, moderately hard, occasionally soft, moderately compact, poorly fissile, feebly calcareous.

SHALE: Light grey to dark grey, moderately hard to moderately compact, poorly fissile, feebly calcareous

SAND :Light grey, light brownish, colourless, friable, fine to very fine, occasionally medium, sub angular to sub rounded, translucent to transparent, calcareous.

SHALE: Light grey to dark grey, moderately hard to hard, moderately compact, poorly fissile, occasionally silty in nature, feebly calcareous.

SHALE: Light grey to dark grey, occasionally brownish grey, moderately hard to moderately compact, poorly fissile, occasionally silty, feebly calcareous.

SHALE: Light grey to dark grey, occasionally brownish, moderately hard to moderately compact, poorly fissile, feebly calcareous, quartz grains present at places.

LIMESTONE: Dirty white, moderately hard, compact, occasionally chalky.

SHALE: Light grey to dark grey, brownish gey, moderately hard to moderately compact, poorly fissile, feebly calcareous.

SHALE: Light grey to dark grey, brownish grey, moderately hard to moderately compact, poorly fissile, feebly calcareous.

LIMESTONE: Dirty white, off white, moderately hard, compact, chalky, occasionally crystalline, occasionally fossiliferous.

SHALE: SHALE: Light grey to grey, dark grey, brownish grey, moderately hard and compact, poor to moderately fissile, occasionally silty, feebly calcareous.

LIMESTONE: Dirty white, off white, buff, moderately hard, compact, crystalline, occasionally chalky, fossiliferous.

LIMESTONE: Dirty white, off white, moderately hard, compact, crystalline, occasionally chalky, fossiliferous.

SHALE: Dark grey, grey, occasionally brownish grey, moderately hard, compact, moderately fissile, occasionally silty, very feebly to non calcareous.

LIMESTONE: Dirty white, off white, buff, moderately hard, compact, occasionally chalky, crystalline.

SHALE: Dark grey, grey to brownish grey, moderately hard, compact, moderately fissile, occasionally silty, very feebly to non calcareous.

LIMESTONE: Dirty white, off white, moderately hard, compact, crystalline.

SHALE: Dark grey to brownish grey, occasionally greenish grey, moderately hard, compact, poor to moderately fissile, occasionally silty, feebly to non calcareous, occasionally carbonaceous.

LIMESTONE: Dirty white, greyish white, off white, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, greyish white, light grey, moderately hard, compact, crystalline, occasionally impure and argillaceous.

SHALE: Light grey to grey, moderately hard compact, poor to moderately fissile, calcareous.

LIMESTONE: Dirty white, greyish white, light grey, moderately hard, compact, crystalline, argillaceous, calcite crystals present.

SHALE: Dark grey to brownish grey, moderately hard, compact, poor to moderately fissile, occasionally carbonaceous, feebly calcareous.

SHALE: Brownish grey, dark grey, greenish grey, moderately hard, compact, moderately fissile, occasionally silty, occasionally carbonaceous, feebly to non calcareous.

LIMESTONE: Light brownish, dirty white, moderately hard, compact, crystalline.

SHALE: Light brownish grey, light grey to grey, moderately hard, compact, moderately fissile, occasionally silty, non calcareous, occasionally carbonaceous, pyritic.

SHALE: Light grey to grey, grey, light brownish grey, moderately hard, compact, moderately fissile, non calcareous to occasionally very feebly calcareous, pyritic.

LIMESTONE: Light brownish, dirty white, moderately hard, compact, crystalline.

SHALE: Brownish grey, grey to light grey, greenish grey, moderately hard, compact, occasionally poor to moderately fissile, occasionally silty, occasionally carbonaceous, feebly to non calcareous, pyritic.

SHALE: Grey, brownish grey, light grey, occasionally ash grey, moderately hard, compact, moderately fissile, occasionally silty, feebly calcareous.

SHALE: Brownish grey, light grey to dark grey, ash grey, moderately hard, compact, moderately fissile, occasionally silty, occasionally carbonaceous, feebly calcareous, pyritic.

LIMESTONE: Dirty white, moderately hard, compact, crystalline.

SHALE: Brownish grey, light grey, grey, moderately hard, compact, moderately fissile, feebly calcareous to calcareous.

LIMESTONE: Dirty white, light grey, greyish white, moderately hard, compact, crystalline and argillaceous.

SHALE: Grey to dark grey, moderately hard, compact, moderately fissile, non calcareous to feebly calcareous.

LIMESTONE: Dirty white, off white, greyish white, occasionally light grey, occasionally chalky, moderately hard, compact, crystalline, argillaceous.

SHALE: Dark grey, grey, moderately hard, compact, moderately fissile, feebly calcareous to calcareous.

LIMESTONE: Light grey, greyish white, dirty white, moderately hard, compact, crystalline, argillaceous.

LIMESTONE: Dirty white, white, greyish white, occasionally buff, moderately hard, crystalline, argillaceous.

LIMESTONE: Dirty white, buff, occasionally greyish white, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, greyish white, buff, moderately hard, compact, crystalline, occasionally argillaceous, occasionally fossiliferous.

LIMESTONE: Buff, dirty white, brownish grey, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Buff, dirty white, brownish, brownish grey, moderately hard to hard, compact, crystalline.

LIMESTONE: Dirty white, buff, brownish white, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, buff, light brownish, occasionally white, moderately hard to hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, buff, light brownish, occasionally white, moderately hard to hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Buff, dirty white, occasionally brownish grey, occasionally milky white, moderately hard to hard, compact, crystalline.

LIMESTONE: Dirty white, buff, brownish white, occasionally brownish grey, occasionally milky white, moderately hard, crystalline.

LIMESTONE: Dirty white, brownish white, buff, occasionally brownish grey, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, buff, light brownish, occasionally brownish grey and milky white, moderately hard, compact, crystalline.

LIMESTONE: Dirty white, buff, brownish white, occasionally brownish grey, moderately hard, compact, crystalline.

LIMESTONE: Dirty white, buff, brownish grey, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, buff, light brownish white, occasionally brownish grey, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Dirty white, greyish white, light grey, buff, moderately hard, compact, crystalline, occasionally argillaceous.

LIMESTONE: Greyish white, light grey, dirty white, moderately hard, compact, crystalline, argillaceous.

SHALE: Dark grey, occasionally brownish grey, moderately hard, compact, poorly fissile, highly calcareous.

LIMESTONE: Greyish white, light grey, dirty white, moderately hard, compact, crystalline, argillaceous.

LIMESTONE: Dirty white, greyish white, light grey, moderately hard, compact, crystalline, argillaceous.

SHALE: Light grey to grey, moderately hard, compact, poorly fissile, highly calcareous.

LIMESTONE: Dirty white, greyish white, light grey, moderately hard, compact, crystalline, argillaceous.

SHALE: Light grey to grey, moderately hard, compact, poorly to occasionally moderately fissile, highly calcareous.

SHALE: Light brownish grey, light grey to grey, moderately hard, compact, poor to moderately fissile, highly calcareous.

LIMESTONE: Dirty white, greyish white, brownish grey, moderately hard, compact, crystalline, occasionally argillaceous.

Lithology-001 (Lithology) from 2714.2 to 2759.0 Meters

Lithology	2714.200m - 275	
Lithology	Bed	
	Drilled	Min
Shale	13.20	1.10
Limestone	28.40	28.40
Coal	3.20	0.90

Lithology-001 (Lithology) from 2714.2 to 2759.0 Meters

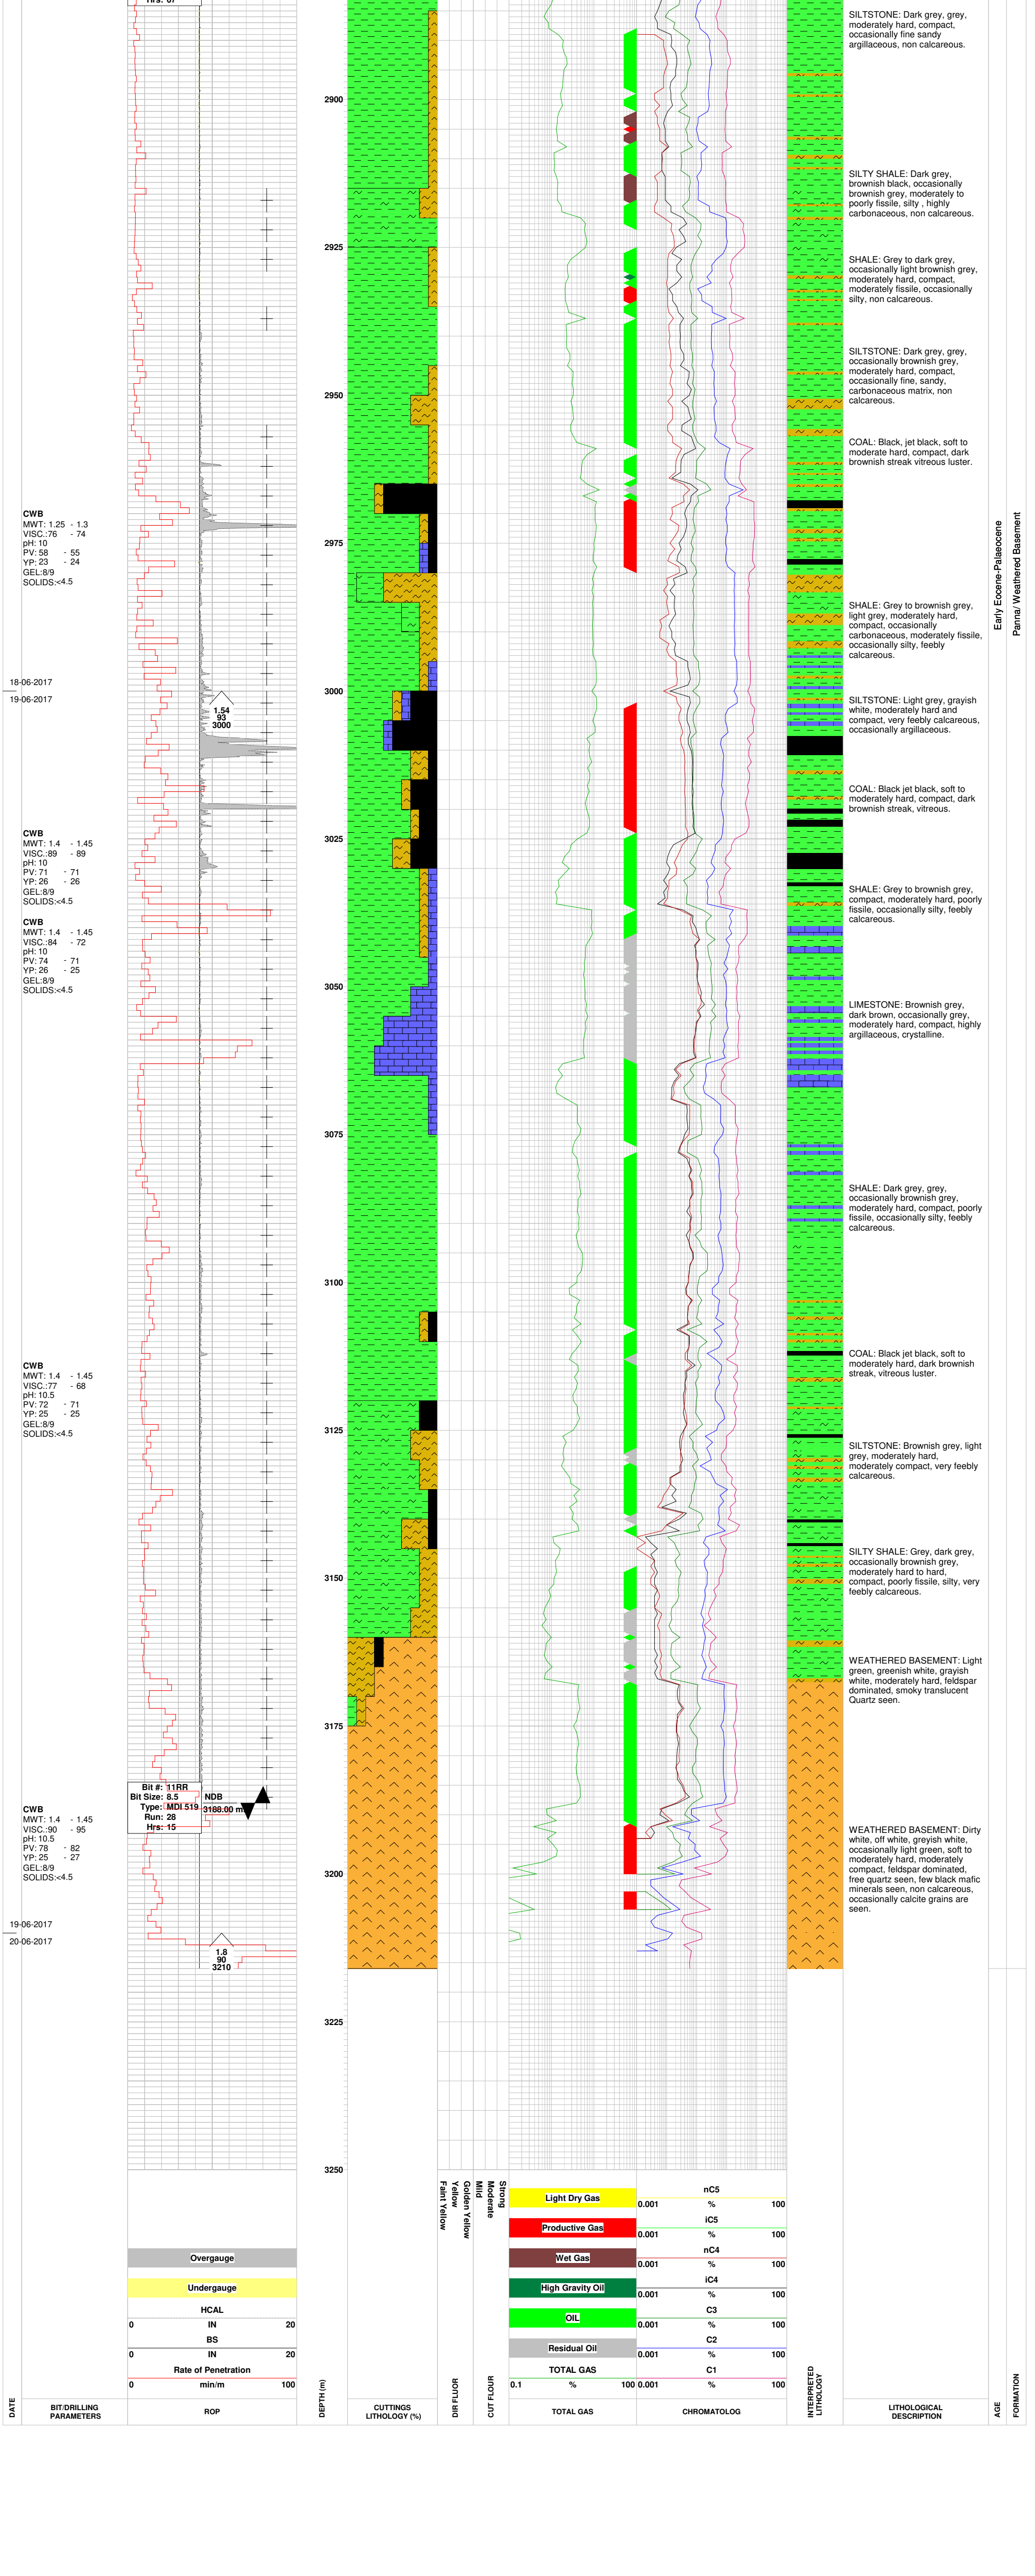
COAL: Black, jet black, soft to moderate hard, compact, dark brownish streak vitreous luster.

SHALE: Dark grey, occasionally brownish grey, moderately hard. Compact, moderately fissile, occasionally silty, occasionally arbonaceous, non calcareous

SILTSTONE: Light brown, brownish grey, moderate hard, compact, occasionally friable, non calcareous.

SHALE: Light brownish grey, dark grey, moderately hard, compact, moderately fissile, occasionally silty, occasionally carbonaceous, non calcareous.

SHALE: Grey to dark grey , light brownish grey, moderately hard, compact, moderately fissile, occasionally silty, occasionally carboncaceous, non calcareous, fossils are seen.



SILTSTONE: Dark grey, grey, moderately hard, compact, occasionally fine sandy argillaceous, non calcareous.

SILTY SHALE: Dark grey, brownish black, occasionally brownish grey, moderately to poorly fissile, silty , highly carbonaceous, non calcareous.

SHALE: Grey to dark grey, occasionally light brownish grey, moderately hard, compact, moderately fissile, occasionally silty, non calcareous.

SILTSTONE: Dark grey, grey, occasionally brownish grey, moderately hard, compact, occasionally fine, sandy, carbonaceous matrix, non calcareous.

COAL: Black, jet black, soft to moderate hard, compact, dark brownish streak vitreous luster.

SHALE: Grey to brownish grey, light grey, moderately hard, compact, occasionally carbonaceous, moderately fissile, occasionally silty, feebly calcareous.

SILTSTONE: Light grey, grayish white, moderately hard and compact, very feebly calcareous, occasionally argillaceous.

COAL: Black jet black, soft to moderately hard, compact, dark brownish streak, vitreous.

SHALE: Grey to brownish grey, compact, moderately hard, poorly fissile, occasionally silty, feebly calcareous.

LIMESTONE: Brownish grey, dark brown, occasionally grey, moderately hard, compact, highly argillaceous, crystalline.

SHALE: Dark grey, grey, occasionally brownish grey, moderately hard, compact, poorly fissile, occasionally silty, feebly calcareous.

COAL: Black jet black, soft to moderately hard, dark brownish streak, vitreous luster.

SILTSTONE: Brownish grey, light grey, moderately hard, moderately compact, very feebly calcareous.

SILTY SHALE: Grey, dark grey, occasionally brownish grey, moderately hard to hard, compact, poorly fissile, silty, very feebly calcareous.

WEATHERED BASEMENT: Light green, greenish white, grayish white, moderately hard, feldspar dominated, smoky translucent Quartz seen.

WEATHERED BASEMENT: Dirty white, off white, greyish white, occasionally light green, soft to moderately hard, moderately compact, feldspar dominated, free quartz seen, few black mafic minerals seen, non calcareous, occasionally calcite grains are seen.
